(b) computer readable program code means for causing the computer to apply said trading strategy to said data stream of real-time market data, said trading strategy including at least one market trigger condition;~~and~~

(c) computer readable program code means for causing the computer, ~~to~~ upon occurrence of one said at least one market trigger condition, to automatically generate an entry ~~or exit~~ order over said distributed financial computer network pursuant to said trading strategy;

(d) computer readable program code means for causing the computer, upon occurrence of another said at least one market trigger condition, to automatically generate an exit order over said distributed financial computer network pursuant to said trading strategy; and

(e) queuing means for queuing the generated order on an order queue.

wherein said trading strategy is written in a substantially English language format..

The Examiner accepts the drawings filed on January 4, 2002.

Allowable Subject Matter

Claims 1-3, 7-8, 16, 18, 21-23, 25-36, 40-41, 49, 51, 54-56, and 58-72 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention generally discloses automate the trading strategy to automatically generate entry and exit orders based upon the strategy. The prior arts of record include the teaching of Tertitski et al. (US 6,493,681) and Li et al. (US 7,043,449). Tertitski teaches visual analysis of investment strategies by using the historical stock data wherein the system recalculating and redisplaying the strategy matrix on a new viewing date. On the other hand, Li teaches real-time market setting in the analysis of securities price movements. However, the prior arts of record fail to teach, singly or in combination, a method for automating trading strategies on a distributed financial computer network

comprising upon occurrence of one said at least one market trigger condition, automatically generating an entry or exit order over said distributed financial computer network pursuant to said trading strategy; upon occurrence of another said at least one market trigger condition, automatically generating an exit order over said distributed financial computer network pursuant to said trading strategy; and queuing the generated order on an order queue, wherein said trading strategy is written in a substantially English language format.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
